Beyond Gun Politics

A TOOLKIT FOR CONVERSATIONS
ABOUT PREVENTING GUN VIOLENCE

Gun violence is about **ALL** of us

Guns, Grief & Grace: Everyone's Toolkit is the work of an academic-community led coalition, formed to create a sustained, non-polarized conversation that will change the ways we think, act and talk about gun violence in the Greater Milwaukee area.

The Toolkit will: empower people, communities and other prevention efforts to engage in non-polarized civil dialogue that lays the foundation for collaboration through sustained community conversations that address all the ways gun violence plays out in urban, suburban, small town and rural geographies.

No one wants more gun deaths and injuries

The initiative advances a framework of public health prevention to inspire and assist all communities to engage in solution seeking, civil dialogue around prevention of suicide, homicide, domestic violence, accidental and mass shootings.

To accomplish this, the coalition is creating a "community informed" online Toolkit, vetted to be non-partisan and providing conversation strategies, including: research and statistics, conversation models, classroom curricula, current and unfolding film clips and works from a range of visual, literary and musical artists and evidence-informed guides and strategies to mobilize communities into solution-seeking dialogue.
